**OFFICE ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30, 54, 57-59 are rejected under 35 U.S.C. 102(b) as being anticipated by Mears et al. (4955025).

Claims 30, 54, 57, col.2, l.58-59 discloses a method of stabilizing a short-pulse fiber laser, comprising: isolating said fiber laser in a temperature-controlled enclosure from an external environment; and operating the fiber laser within the enclosure while utilizing the enclosure to stabilize a repetition rate of the fiber laser (since the fiber laser is inside the enclosure, the rep. rate of the fiber laser must be stabilized because there is no temperature variations in the enclosure).

Claim 58, col.2, l.14-16 discloses the piezoelectric transducer.

Claim 59, col.2, l.30-34 discloses the phase lock loop circuit.

***Allowable Subject Matter***

Claims 31, 34, 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The above prior art fails to disclose the limitations as recited in the claims.

Claims 32, 36 are also found objected due to their dependency of the above claims.
